Agenda & Discussion Points

1. Database Design

- Two databases will be used: one for clients and one for freelancers.
- A registration database will be shared between both user types.

2. Authentication System

- Authentication has been set up.
- If a user is not registered, they will be prompted to register.
- If a user is already registered, they can log in using their email and password.

3. Homepage Features

- A search button is available on the homepage that leads to the search freelancers page.
- Freelancer suggestions will be displayed — to be reviewed as a potential user story.

4. Error Handling

- Team will test for common errors and improve error handling throughout the system.

5. UI/UX Updates

- we will remove the “See More” option as it currently does not function properly or show additional content.
