

Software Design Minutes Meeting

Date: 24 April 2025

Attendees:

1. Phetho Nemavhola
2. Paballo Lipopo
3. Nsovo Nkuna
4. Vhulenda Mashamba
5. Ezra Nkontwana
6. Khutso Mashapu

Discussion Points & Decisions

1. Login System

- Decision: Retain the login page.
- Action: Replace manual login form with third-party authentication (e.g., Google login).

2. Freelancer Features

- Add functionality and interface elements for the freelancer side of the platform.
- Ensure use cases explicitly cover the freelancer role.

3. UI Feedback

- UI is generally fine.
- Clarify that clicking “Ready to Link” navigates to the “View Freelancer List”.

4. Deployment Relationships

- Clarify all relationships involved in deployment.

5. Use Cases

- Add freelancer-side components to the use case diagram.

Action Items for Next Week

- Conduct **5 meetings** during the week.
- Move tasks from backlog to “done” when completed.
- Overview of features should be functioning.
- Ensure user stories for **freelancer**, **admin**, and **reporting** are operational.
- Identify 6 user stories still pending or incomplete.
- Complete all **4+1 architecture diagrams** for every MVP view.
- Push all changes to the main branch with a release note.
- Achieve **60% code cov** on both **HTML** and **JavaScript** files—**not just one**.
- Eliminate stubs; use **actual data from the database**.
- Plan to meet again next week, **likely Wednesday**.
- Focus areas include: **approving appointments**, **tracking functionality**, and general progress.
