USER STORIES

USER VERIFICATION (LOGIN AND REGISTRATION)

USER STORY

WHO : As a client

WHAT : I want to create an account on the freelancer platform and log in securely.

WHY : So that I can search for freelancers to complete my tasks

User Acceptance Test – Success Case

Given I'm a new client user
When I:

Fill in the registration form with valid details

Submit the form
Then:

- My account should be created
- I should be automatically logged in
- I should be redirected to the freelancer search page

User Acceptance Test – Failure Case

Given I'm a new client user
When I:

- Fill in the registration form with missing or invalid details
- Try to submit the form

   Then:
- I should see clear error messages (e.g., "Email is required")
- My account should not be created
- I should stay on the registration page until all fields are correctly filled

---

POP UP MESSAGE

USER STORY

Who: As a newly registered client on the Freelancer Management System,
What: I want to receive an in-app pop-up message confirming my successful registration,
Why: So that I know my account was created successfully and I can proceed to explore the platform confidently.

User Acceptance Test – Success Case

Given I've filled in all my details

When I click "hire talent"

Then I should get a pop up message that says "registration successfull"

User Acceptance Test - Failure case:

Given I've not filled in all my details

When I click "hire talent"

Then I should get a pop up message that says "Fill all fields "

VIEW FREELANCER LIST

USER STORY

Who: As a client,
What: I want to see a list of freelancers immediately after landing on the home page,
Why: So that I can quickly browse through available freelancers and find the right one for my project.

User Acceptance Test – Success Case

Given: A client logs in and lands on the home page

When: The home page finishes loading

Then: A list of freelancers is displayed with names, skills, and ratings

User Acceptance Test – Failure Case

Given: A client is on the home page after logging in

When: The page loads

Then: The freelancer list is empty or only names are shown (missing skills) – failure in loading/display logic

Search for Freelancer

WHO : As a client

WHAT : I want to

- Use a search box to look for freelancers

- Filter them by skill, name, or category

WHY: So that I can find and contact the right person for my job

User Acceptance Test – Success Case

Given I'm a logged-in client
When I:

- Enter a search keyword (e.g., skill)

- Submit the search

Then:

- A list of matching freelancers should be displayed

- I should be able to view their profiles

- I should be able to select one to contact

User Acceptance Test – Failure Case

Given I'm a logged-in client
When I:

- Enter a keyword that doesn't match any freelancer

Then:

- I should see a message like "No freelancers found"

- I should be given suggestions to refine my search

FILTER FREELANCERS

USER STORY

Who: As a client using the Freelancer Management System,
What: I want to filter freelancers using a search button based on the profession of the

freelancer I want,
Why: So that I can quickly find the most suitable freelancers for my project needs.

User Acceptance Test – Success Case

Given: A client is on the freelancer search page

When: The client enters "React" and clicks the search button

Then: Only freelancers with "React" in their skills or experience are shown

User Acceptance Test – Failure Case

Given: A client enters "React"

When: The search button is clicked

Then: No freelancers are shown, despite having "React" in their profiles (indicates failure in search logic)

FREELANCER MANAGEMENT PROFILE

USER STORY

Who: As a client,
What: I want to see a freelancer's skills, location, and rates when I click on their profile,
Why: So that I can evaluate their suitability for my project directly from their profile page.

User Acceptance Test – Success Case

Given: A client clicks on a freelancer's profile from the list

When: The profile page opens

Then: The freelancer's skills, location, and rates are visible

User Acceptance Test – Failure Case

Given: A client clicks on a freelancer's profile from the list

When: The profile page opens

Then: The freelancer's skills, location, and rates are visible

EMAIL SYSTEM

USER STORY

Who: As a client,
What: When I click on " Hire me" it must redirect me to the GMAIL
Why: so I can draft an email to the freelancer, confirming that they have been hired and beginning the next steps.

User Acceptance Test – Success Case

Given: A client views a freelancer's profile and sees the "Hire Me" button

When: The client clicks the button

Then: The Gmail compose window opens with the freelancer's email in the To field

User Acceptance Test – Failure Case

Given: A client clicks the "Hire Me" button

When: Nothing happens or a 404 error is shown

Then: Test fails due to improper redirect or broken link

Project Management (Track Progress)

User Story

WHO :As a client

WHAT : I want to

- Track the progress of a task assigned to a freelancer

- View regular updates

WHY : So that I can stay informed until the task is completed

User Acceptance Test – Success Case

Given I'm a logged-in client who has assigned and paid a freelancer
When I:

- Navigate to the project page or freelancer's profile

- Click "View Progress"
  Then:

- I should see a progress indicator or status updates (e.g., "In Progress", "50% Complete", "Completed")

- I should be able to monitor the task until it's marked "Completed"

Given the freelancer hasn't submitted any updates
When I:

- Click "View Progress"
  Then:

- I should see a message like "No updates yet"

- The system should encourage the freelancer to submit progress updates

PAYMENT

User Story
WHO :As a client

WHAT : I want to:

- Pay a selected freelancer for a task

- Ensure the transaction is secure and confirmed

WHY: So that I can compensate them fairly for their work

User Acceptance Test – Success Case
Given I'm a logged-in client who has selected a freelancer
When I:

- Click the "Pay" button on the freelancer's profile

- Enter valid payment details

- Confirm the transaction

Then:

- The payment should be processed successfully

- I should receive a confirmation message or receipt

- The freelancer should be notified of the payment

User Acceptance Test – Failure Case
Given I'm trying to make a payment
When I:

- Enter invalid or expired card details

- Or lose internet connection mid-payment

Then:

- I should see a clear error message (e.g., "Payment failed")

- No funds should be deducted

- The freelancer should not be notified

WEBSITE ABOUT

USER STORY

WHO : As a client when I am on the homepage

WHAT: I want to click on the "About" button

WHY: so that I can see the About section containing website information

User Acceptance Test – Success Case

Given I am on the homepage

When I click the "About" button

Then the page scrolls down to the About section showing information about the website

User Acceptance Test – Failure Case

Given I am on the homepage

When I click the "About" button

Then nothing happens or the page scrolls to the wrong section
